Location: Room 5 Executives

Agenda:

- Project Discussion
"How bunching in prices can be an indicator of collusion and market manipulation"
Speaker: Elsa Camuamba, Know-Net-Compet Project
- Discussion and Q&A

About this Seminar series

The Applied Economics & Analytics Lab at NOVA IMS is pleased to announce the launch of a Seminar Series, taking place twice per month. This initiative aims to foster intellectual exchange and advance collaborative research within the scope of two FCT-funded projects:

- RiskGuard: Effective Risk Assessment in Public Procurement (FCT Ref. 2024.07468.IACDC)
- KNOW-NET-COMPET: Embedded Knowledge and Networks – Complexity in Antitrust Collusion Mitigation (FCT Ref. 2024.07378.IACDC)

Each session will bring together team members and invited guests to share findings, discuss methodologies, and explore interdisciplinary insights across both projects' thematic areas.

Acknowledgements

This Seminar Series is supported by national funds through FCT – Fundação para a Ciência e a Tecnologia, under the projects:

- 2024.07468.IACDC – RiskGuard: Effective Risk Assessment in Public Procurement (DOI: 10.54499/2024.07601.IACDC)
- 2024.07378.IACDC – KNOW-NET-COMPET: Embedded Knowledge and Networks: Complexity in Antitrust Collusion Mitigation (DOI:10.54499/2024.07378.IACDC).
